DD alternative: Type A adapter included, \$99.99 sale (different configuration) - [B&H \[9\]](#)

R = read; W = write; Max = published maximum. Gb/s is bus bandwidth, not measured file throughput. No controlled benchmark is provided.
* NC: USB4 per Adorama; B&H lists 10Gb/s. Both list 3,200MB/s; supplied catalogue lists R/W 3,600. Host specification remains unresolved.
† PD: retailer lists 5GB/s (= 40Gb/s / 8); this is not adopted as verified card-file throughput. ‡ SN: overview says Gen 2; specs table says Gen 1.
Prices: B&H, new readers, USD, tax/shipping excluded; cards not included (also in photo). Sales and listings may change. Selected products only.
Not listed = no verified directional MB/s figure or price displayed. Warranties are retailer-listed limited terms; Canadian service requires confirmation.
