-20°C to 120°C

Keep Fresh

Zeolite absorbs ethylene gas.

Eco-friendly

Convenient

HI COMPANY and EatFresh

Made in Korea

Reusable food storage developed around zeolite.

HI COMPANY presents EatFresh for domestic distribution and export. Korean manufacturing partners handle production.

The brand focuses on keeping ingredients for later meals and reducing reliance on disposable storage.

Everyday use and care

01

Before storage

Remove excess moisture from fruit and vegetables before placing them in the container.

02

During storage

Store food by type and close the lid. Wipe away condensation when it forms.

03

For the next meal

Keep food at its appropriate temperature. Freshness depends on its initial condition and storage.

Multi Box capacities: 3,500 mL and 5,500 mL
