Food is everything.

Food Storage Containers

Illustrative lifestyle scene

HI COMPANY and EatFresh

Made in Korea

Reusable food storage developed around zeolite.

HI COMPANY presents EatFresh for domestic distribution and export. Korean manufacturing partners handle production.

The brand focuses on keeping ingredients for later meals and reducing reliance on disposable storage.

Documented product development

Korean patent document

10-2667896

The supplied document concerns a food-storage container moulded body and its manufacturing method.

Patent documentation is distinct from a product performance test.

Everyday use and care

01

Before storage

Remove excess moisture from fruit and vegetables before placing them in the container.

02

During storage

Store food by type and close the lid. Wipe away condensation when it forms.

03

For the next meal

Keep food at its appropriate temperature. Freshness depends on its initial condition and storage.

Reusable containers made through Korean manufacturing partners.
